DETAILED ACTION

Response to Amendment

1. This Detailed Action is in response to the amendment filed on 10/24/03. Claims 1-84 are currently pending. The Applicant has amended claims 1, 31, and 82-84.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-84 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Claims 1, 31, and 82-84 have been amended to include "used directly without intervening reducing step or oxidizing step, as a carbonylation catalyst". This limitation was not described in the specification.

Allowable Subject Matter

4. The following is a statement of reasons for the indication of allowable subject matter: The instant application is allowable over the cited prior art, because the cited prior art fails to disclose wherein the carbonylation catalyst composition may be used directly without an intervening reducing step or oxidizing step, as a carbonylation catalyst. Ofori et al. (US Patent 5,981,788) teaches the recovery of catalyst constituents for recycle by extraction and evaporation followed by oxidation and

reduction. Buysch et al. teaches wherein the catalyst is reactivated using an oxidizing agent. The instant invention is allowable over the cited prior art, because the instantly claimed carbonylation catalyst may be practiced without the oxidation and reduction steps as required in the prior art.

Response to Arguments

5. Applicant's arguments with respect to claims 1-84 have been considered but are moot in view of the new ground(s) of rejection.

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
